

CHAPTER 3
SCIENCE INQUIRY**Tissues Found in Plants****BLM 3-5**

(continued)

2. Why do you think xylem tissue is useful to a plant?

3. Why is phloem useful to a plant?

4. Why do you think it is important for a plant to have different types of vascular tissues?

5. What substances are transported in the xylem? What do you think is the direction of movement?

6. What substances are transported in the phloem? What do you think is the direction of movement?

7. What does the epidermal tissue do in a plant?

8. How does the function of the epidermal tissue in a plant compare with the function of epidermal tissue in an animal?
